*\* Prayer*

# GRATITUDE

Honor and serve the people who work for you with Royalty. They will honor and serve you with rich dividends of honesty, integrity and commitment towards duty. I always feel eternal bliss when I appreciate someone, say a thank you to them and see a smile cross their face. When we are grateful to people who we are associated with us their cheers go miles in making our day brighter. Believe in yourself and your team, lead them and shower praises on them you will see amazing results. Maintain a gratitude journal and try to praise at least one person in a day, you can appreciate your own efforts too, remember to talk to your self every day and appreciate one good act of yours from self-appreciation move to appreciating others and the efforts they put in. I would like to express my sincere gratitude to parents, teachers and students who have grappled with the pandemic and helped us in the smooth transition from offline to online classes. Let the spirit of gratitude lead us from being far away from family and friends to begin near them with a word of appreciation. Don't wait for a particular time to do it, start it now...cheers

## MAKAR SANKRANTI FESTIVAL (SANKRANTI SAMBARALU)

Our country India is a land of festivals. Here every festival is celebrated with lot of enthusiasm and zeal.

Makar Sankranti is the festival of harvesting, kites and charity. It is celebrated on January 14<sup>th</sup> every year throughout India with splendor and glory. The reason for festival celebration in preschools is to create the spirit for our culture in children. In addition, these festivals give the opportunity to indulge kids in different activities and explore their creativity.

This year preprimary wing of Pallavi Model School Alwal celebrated this festival online with the new vision and style.

All our young minds along with their parents were dressed up in traditional attire with a festival corner at their homes. We started our celebration with prayers and then explained our tiny tots about how this festival is celebrated for three days by showing the short videos of kids sent by our parents.

Parents participated in the rangoli making competition and made beautiful rangoli's. They all wrote PMS ALWAL in front of the rangoli design. It was a pleasure to witness the virtual rangoli competition.

After this we involved parents along with their kids to play games like bursting the balloon by sitting on it, sorting of gems, blow the balloon and throwing the glasses by releasing the air from it. Kids enjoyed a lot playing these games with their parents. Parents appreciated the efforts put in by the team to bring the family together to spend some valuable time with each other.

**"SCIENCE IS SIMPLY THE WORD WE USE TO DESCRIBE A METHOD OF ORGANIZING OUR CURIOSITY"**

Science Week (Sometimes National Science week) refers to a series of science related events. The aim of science week is to engage and inspire students of all age groups with latest development in the field of science and technology and to display fun side of science.

We at PMS-ALWAL presented this special assembly with a wonderful speech by our beloved principal ma'am, word of the day followed by Tech-News and learning about our Indian Scientist Vikram Sarabhai who has contributed and helped in the development of our country to reach for the sky and made our life simpler.

The most interesting element of the assembly was the demonstration and explanation of science experiments by the students which was not only amazing but were also food for thought. Students got a chance to observe and learn several interesting aspects of science through these visual presentations which was followed by a quiz which saw active participation from students.

We can conclude by saying Science is a discovery on its own and it plays an important role in our journey.

Actually there is nothing special about my school but My school is special instead! We have a unique system that allows us as students to make our way to follow our dreams! High school makes a start each day with a positive thought ☐ and a calming prayer that marks the start of a wonderful day!

In our school, we just don't go to study academics but we go to share our thoughts and knowledge, we go to our school to learn the basics of life, We go to the school to learn to show out the inner talent and explore ourselves!

Our school is not only a school but our school is a mentor, a guide, a friend and most importantly it is that person with whom we can share the best moments of our life!

Because my school believed in me, now I am here following my passion, my dreams and I already started my journey to success by achieving different milestones from now itself. All thanks to my Pallavi!

If I talk about our school the list will be endless but I think that is enough to say that My School is special!

**DIYA KAUSHIK**  
**CLASS 7 A**

A child first sees its mother and its home as their first world. The World next to its Mother and Home is its Teacher and School. Our first teacher is always memorable afresh in our minds.

Few beautiful rich disciplines and habits are cultivated at our school where they help to shape a child's behaviour to be framed in future. Such a school is my school where I can proudly say of.

Apart from academic education a child needs good mental health and physical health which is also taken care of by my school and its teachers. We enjoy studying and playing at School there by improving our mental and physical health doing many activities related to the

concepts being taught and sports activities refreshing our mental health. A school, teachers and their students begin their year with a beautiful start off getting along with each other moving into next part of their education, sports activities, their exams and finally comes The School Day/Annual Day where school, students and teachers leave beautiful memories left in their minds for the whole year they have spent with a special bondage with each other.

My school also celebrated such beautiful Annual Day where I also enjoyed with my friends and teachers giving beautiful performances by me and my friends at School. Then comes The Farewell Day where we give farewell to each other collecting and carrying all beautiful days and experiences to the next academic year.

This Pandemic has also made us to maintain the bondage with each other celebrating virtual tour in Disney Land, Jenmashtami, Rakhi, Christmas, celebrations etc., carrying sweet memories with each other.

Such beautiful days and experiences cannot be had anywhere other than my school. That's why My School and my teachers are so special to me.

# NATIONAL TOURISM DAY

“Travelling is not just travelling -it is meeting people, understanding cultural differences and learning across the boundary”

The students of grade III on the topic “World Tourism Day” conducted a special assembly. The assembly commenced with prayer followed by new word and thought for the day on the theme of assembly. Our Principal Mrs. Sunir Nagi addressed the students and spoke about the significance of the day and motivated the students with her encouraging words of wisdom. Our coordinator Mrs. Sripriya shared her valuable insight on the importance of the day. Students displayed various tourist places of India. They dressed up exuberant attire representing the states. All the students enjoyed and learnt about the importance of “World Tourism Day”.

# **TIME CAPSULE**

## **THE TWO MOST POWERFUL WARRIORS ARE PATIENCE AND TIME**

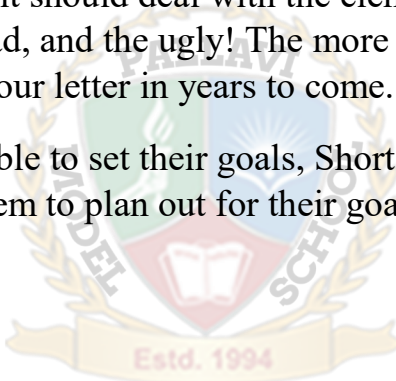

Time capsules are fun to make, and even more, fun to open years down the line. A time capsule can be any container that holds objects meant for people to open in the future, whether that be in 5 or 10 years. A good time capsule will hold its content safely, preserving them for a future version of yourself. Soon you will have the skills to create a time capsule that will thrill and fascinate someone in the future.

Make a Time capsule in the form of a letter to yourself, that include the following six parts.

- 1. ME, NOW:** my hopes, fears, dreams, intentions, goals, problems, concerns, likes, dislikes, joys, frustrations; what I like about myself; what I don't like about myself; etc.
- 2. MY WORLD:** A description of my home, bedroom, school, neighborhood, town; my favorite places to go; chores, allowance, pet(s), possessions, clothes, religion, current events; FAVORITES – books, music groups, movies, TV, etc.
- 3. WHAT I DO:** my hobbies, pastimes, sports, school activities; what I do with friends; favorite snacks and foods; chores; how I spend my weekends and vacations; special activities I do, organizations I belong to, etc.
- 4. PEOPLE IN MY LIFE:** my family, siblings, aunts & uncles, grandparents, friends, best friend(s), teachers, the opposite sex, “him” or “her”, who I like, people I'd like to know better, people I admire and respect, important people in my life, people who annoy me, etc.
- 5. MY PAST:** where I was born, where I lived, growing up, childhood accidents, childhood memories, schools I attended, previous pets, trips I've taken, important events in my life so far, former friends, former teachers, teams I played on, previous romances, etc.
- 6. MY FUTURE:** predictions, what I want to do, my long range intentions, what I'm looking forward to; my goals, Create your own categories.

This “Letter To Self” is for you, and it should deal with the elements and aspects that are important and real in your life –the good, the bad, and the ugly! The more honest you are with yourself, the more you will appreciate and value your letter in years to come.

By this activity, students will be able to set their goals, Short term goals as well as long term goals. This Time capsule will help them to plan out for their goals which intern will lead them to achieve their long term goals.

The most interesting thing in the time capsule is students can always go back down to the age and recollect their sweet memories spent with their near and dear. This Time capsule will also connect them to their real life situations. This will help them to understand Time-management and work out their goals in a systematic procedure, in this way students will learn to value time.

As children grow they can use this Time capsule as their reference for further planning of their future. And the Time capsule will always encourage them to work out for achieving their goals and to keep a check on time.
