# LESSONS LEARNT DURING THE PANDEMIC

What can a human want for during the pandemic? A ray of hope that can work as an enormous encouragement, especially during these exasperating times. When the entire world is reeling under the effects of the pandemic, a reassurance that 'we shall overcome' will be that ray of hope at the end of the dark tunnel as we unpretentiously wait for the vaccine to combat this pandemic.

Gratitude--- My first lesson, I still remember how my teachers taught me the importance of three magical words which can open many hearts- sorry, thank you and please. My heartfelt gratitude to all the frontline who are helping us to tide over the pandemic.

Charging on by being Resilient---The pandemic struck me as a jolt out of the blue. Things were not going to be customary anymore, life had taken a U turn. It was healthier to get adapted to the new normal being resilient.

Time to up skill—Work from home gave me time to hone my skills through webinars. These learnings came in great use to deal with situations, one should be able to adopt the changes and become adept.

New Innovations---Online classes were a challenge and I had to come up with Novel ideas to engage all stake holders in fostering this new type of synchronous learning. Parents conducted webinars, Ex-students started becoming speakers and enlightening the students, virtual tours and picnics made life fun. Online inter school competitions were successfully piloted. I have even planned a grand Annual day [on line].

What I am missing---Despite online meetings I find the portals of the school void of fun and laughter. I look at the school theatre and empty playgrounds, the noises beckon me of the glory of the past. School Building and infrastructure don't make a school it's the stake holders make the school lively.

As I sum up I would say I have learnt to adjust myself and my needs – “Life is all about adjustments...Between your needs and your dreams...at every stage you have to learn to sacrifice many of your desires and move on”

And Life Moves on...

## CRESCENDO

The heights by great men reached and kept were not attained by sudden flight, but they, while their companions slept, were toiling upward in the night- by Henry Wadsworth Longfellow.

The quote so fits well with Pallavi Model School- Alwal, while it took off on a tour of e learning well complemented with e celebrations and one such merriment is the annual day. This happened at an ease because of our visionary chairman Mr. M Komarraiah who trained his teachers quickly to be well equipped with technology.

Annual day is celebrated in our school spreading joy and showcasing talent where students would want to outsmart the other in a healthy competition. Every year we go with a theme and this year it is CRESCENDO for students of grade 6-12 which was envisaged by the principal and conceded by the chairman.

Our Principal Ms Sunir Nagi had a tete a tete with the students during the program and also emphasized the joy of online classes and the innovations it has taught us.

Virtual learning has proven to be a blessing in disguise creating a manifesto of technology in its own way. Students of all age groups have explored and expanded their knowledge in various fields of cinematography be it graphics, video making, animation and even acting and scripting.

CRESCENDO is the celebration of the co-existence of the four river valley civilizations at its niche. The brilliance added by the beauty in marble, the symbol of love pepped up the whole occasion while the classic life of Ashoka depicting tolerance, a reformation filled pride amongst the audience.

The atmosphere and the ambience gleamed despite the e-platform with cheerful students, encouraging parents, committed teachers, motivating principals from all branches of Pallavi and DPS Nacharam and Nadergul, Academic director Dr. T Sudha, diligent directors whose constant support kept us moving, enchanting chairman and elate guests who joined the celebration with great fervor enjoying the event confined to their homes.

Our distinguished chief guest, Mr. P. Raghuveer, I.F.S. had graced the occasion and flavoured wisdom with his words amongst the young generation.

The vigour and valour we relish today as our characteristics dates back from the power of our past and the jaw dropping innovations of each of the civilizations left the spectators awestruck.

Their existence and their cause, their rituals and their cultures showcased by the students on a distance mode e-platform had floored the audience. The joy and excitement shared by all the stake holders coming together through technology created a relaxed and a looping moment.

As dusk began to descend, people started to leave the session with complements to cherish. The annual function ended with a vote of thanks speech by our vice principal Ms. Vidyadhari Rao who mentioned every effort that had in its own way made the program a grand success.

Annual function of the tiny tots and the growing buds

The Annual function of a school is the most awaited day of the year. The students gear up in full swing to showcase their talents and teachers take pride in their novices. Though, just at a time when the world is going through the phase of a global pandemic, students and staff of Pallavi Model School, Alwal were preparing for the D-day. As said, 'It is only in our darkest hours that we may discover the true strength of the brilliant light within ourselves.' It was the vision of the Chairman, Mr. Komaraiah and the distinct idea of the Principal, Ms. Sunir Nagi that seeded the concept of 'Rangotsav'.

'Rangotsav' as the theme rightly states about the celebration of colours was vibrantly portrayed by the students of the primary wing, grades 1 to 5. On 12<sup>th</sup> November, when parents gathered online to watch their tiny tots enjoying dancing in gay abundance to the tune of the folk music of various Indian states our academic director Dr. Sudha.T addressed the gathering with great enthusiasm. The programme began with watering the plants as is the culture followed at Pallavi Model School.

The audience admired the traditions and culture that co-exist in our country. The chief guest Mr. Gagan Narang, Arjuna Awardee and an olympic rifle shooter the guest of honour Ms Sampreeti Malladi, a recipient of JRF awarded by HRD graced the occasion and imparted the words of wisdom to guide children in their future endeavour. We had elate guests, director Mr Sushil Kumar, director Ms Anita Reddy, principals of all the branches of Pallavi model group of institutions, who appreciated the revelries presented by the little ones.

The atmosphere glowed despite the e-platform with joyful students, cheering parents, dedicated teachers. The states from Kashmir to Kerala were portrayed gracefully by the talented buds and values taught through festival were given due respect and importance in shaping young minds.

The programme ended on a pleasant note, sharing the theme of 'Unity in diversity' that has been a pride of we Indians. The vote of thanks by Ms Uma Das, Academic incharge added grace while bidding adieu marking the beginning not the end.

# IMPORTANCE OF SPORTS

## GRADE 1 SPECIAL ASSEMBLY

Sport refers to an activity involving physical activity and skill. Here, two or more parties compete against each other. Sports are an integral part of human life and there is great importance of sports in all spheres of life. Furthermore, Sports help build the character and personality of a person. It certainly is an excellent tool to keep the body physically fit.

Sport is certainly an excellent tool to build self-confidence. Playing Sports increases confidence to talk properly. A sport certainly improves the skills of communicating with others.

Sports bring discipline in life. It certainly teaches the values of dedication and patience. Sports also teach people how to handle failure. The importance of following a time schedule is also present in Sports.

# WORLD KINDNESS DAY

7

“Wherever there is a human in need, there is an opportunity for kindness and bring a difference “

On a day devoted to the positive potential of both large and small acts of kindness, try to promote and diffuse this crucial quality that brings people of every kind together.

So, to bring awareness about world kindness day a short assembly was conducted by class10 students.

The assembly highlighted the importance of being kind in various situations through a heart touching video. It also showed the importance of being kind. Scientifically it was proved that being kind makes us mentally, emotionally and physically strong.

Kindness is best learned by feeling it so that they can express it. The PPT highlighted that what we experience when being kind are because of endorphins and serotonin. They activate areas of brain that are associated with pleasure, social connection and trust. These feelings of joyfulness are proven to be contagious, encouraging more kind behaviour by giver and recipient. This important chemical affects learning, memory, mood sleep and health and digestion. Children with positive outlook have greater attention spans, more willingness to learn and better creative thinking to improve performance of children.

The assembly was concluded with few words from our Headmistress Susan John .

## STAY FIT DON'T QUIT

“Health is a state of complete physical, mental, and social well-being and not merely the absence of disease or infirmity.”

Mental and physical health are probably the two most frequently discussed types of health.

Spiritual, emotional, and financial health also contribute to overall health. Medical experts have linked these to lower stress levels and improved mental and physical well-being.

Good health is central to human happiness and well-being that contributes significantly to prosperity and wealth and even economic progress, as healthy populations are more productive, save more and live longer.

For a healthy life cycle, you need a healthy and balanced diet, good hygiene habits, staying in a proper shelter and getting enough sleep.

In addition, you will have to participate in physical activities, weight management, and stress management activities.

# ARTICLE ON CONSTITUTION DAY

Today, the students of class 8<sup>th</sup> presented an assembly on the theme “Constitution Day”. The assembly was started with a prayer which is believed to provide peace to our mind and souls. And then our Principal Mrs. Sunir Nagi Ma’am addressed the gathering and motivated the students with her encouraging words and also gave the information about why do we celebrate constitution day. After that we played 2 skits which were depicting the rights provided by our constitution and after that we got know more about this by a speech of an advocate parent of a student of our school. And the assembly culminated with the rendition of the National Anthem.

Today, from this assembly I learnt more about our constitution day and got to know about our basic rights which we often forget to use. And also how unique our constitution is, it is a longest written constitution in the world and got a collection of no. of laws from different countries in the world.

## Backdrop Po(art)y and Fingerprint Po(art)y

What exactly is art integration? According to the John F. Kennedy Center for the Performing Arts, an art integration can be defined as “an approach to teaching in which students construct and demonstrate understanding through an art form. With this definition, we know that art integration is not simply drawing a picture of Snow White after reading Snow White and the seven dwarfs. It has to reach much deeper than that for the student to be able to show that they truly understand the subject matter they are on. Being that the definition states it is an approach to teaching, this tells us that art integration should be a method of teaching and not just done once a semester for sake of doing it.

One of the forms of art that were introduced to create poetry with the available text and the resources was the backdrop/Fingerprint poetry. The objective was to generate a poem, keeping in mind the theme of the lesson and the words related to it.

The students were asked to use any newspaper, old magazine text and select a part of the text, they underlined the words that can make a sensible poem with limited words, and drew connections from one word to another while threading the poem.

Another idea was to write the poem on the fingerprint background, free verse poetry, without limitation of words, they learnt the poetic device enjambment and personification.

To make it more appealing, they drew geometrical patterns to highlight the words.

Hence on the theme of afforestation, Love nature, gifted nature, benefits of trees, the students presented the poetry in the form of a video in the class.

# “EVERY MORNING WE ARE BORN AGAIN. WHAT WE DO TODAY IS WHAT MATTERS MOST”.

“Buddha” is the one who has attained enlightenment and has a sense of awakening to build a peaceful, harmonious society. His values are increasingly relevant in the present context and a guiding light for chalking out a sustainable approach for the future. The Buddha’s method of introspection and awakening shows the path in these troubling times. To enlighten these buddha values to the children of Pallavi model school ,Alwal a special assembly was conducted on 17 th November 2020 on virtual platform which was hosted by grade 5 & 6 .Buddha Pala Bhiku a Buddhist monk was invited for a tete a tete with students on the topic Buddhism – Enlightening the human values. The assembly commenced with the Buddhist shloka and the chat with the guest speaker . His words had empowered the students and enlightened all of us. This wonderful session was successfully conducted under the guidance of our Respected principal ma’am and our block head Uma Das Ma’am .

## SREEVIDYA GRADE-IX

Hello friends! Are you'll scared of math? Then read this little article to say bye to your fear. Most of my classmates are scared of mathematics and even me. Do you want to get out from this fear? First and for mostly you should understand that mathematics is not a very difficult it's all just about understanding. And secondly you should know even the difference between learning and studying. The basic difference between studying and learning is that learning is you understanding things or concepts by your own while studying means that you are by hearting something. So it's better to learn something rather than studying. As we need good foundation to construct a strong building we need be perfect with our basics of mathematics. If we are thorough with our basics then we are all set for doing the higher or complex sums. Also we shouldn't be scared and tensed while we write our exams Another point is you should be able to understand the question and visualize the question. If you can visualize the question or able to draw the given question it is quite easy for us to solve the question. So leave the fear you have and think critically and try to make the problem as simpler as possible Leave your fear and face mathematics and score good .
